Summary:

   I have always been a dedicated and determined individual who sets goals for himself. Therefore, when I developed an interest in programming, I did not hesitate to turn my interest into a possible career. Having learned most of my skills through self-teaching, I have developed valuable skills that are reflected in my work. Learning from mistakes and successes I have completed various projects and hope to keep expanding my knowledge and creating more material

#Skills

Front-End	Back End	Source Control	Frameworks	UI/UX
JavaScript ES6				
TypeScript	Node.JS	GitHub	React	Adobe Xd
CSS / SASS	Express.js	Git (Git Flow)	Bootstrap	Photoshop
HTML	MongoDB		Next.js	Figma
Responsive Design				

#Projects

Popcorn Fun
Calorie & Exercise journal

I love watching movies and TV, with wanted to create my own website where I could search for my favorite show, movie and actor see their info.

 Made with - React, next.js, styled components

Website: https://keep--track.herokuapp.com/ GitHub: https://github.com/reduardo92/simones_Bar

Keep Track
Calorie & Exercise journal

A calorie and exercise journal, I wanted to re-create some of the functionally of one of my favorite app where I could track my food and workouts. Easy login **Email:** demo@demo.com **Password:**123123
